

The new SMART

Logic Evolution.

Dear Friends and Customers of LOGICDATA,

Today you are reading the new LogicOffice newsletter. This newsletter is the start into a new technological era for sit-/stand-tables. LOGICDATA has always been standing for innovation leadership and has again invested a lot for you and your customers. Our mission statement 'creating intelligence for adjustable furniture' represents our passion and is our mission for you. Throughout this newsletter you will experience the latest trends and get a taste of revolutionary product novelties for

the upcoming months. LOGICDATA is always the first address as far as the technological future of sit-/stand tables is concerned. We have impressively proven that four years ago with the introduction of the first SMPS (switched mode power supply) control box and continue this path of simplicity and cleverness again this year. We again took the challenge and pushed the limits to achieve a plus in comfort, ergonomics and cost savings for you. Simply put 'LogicEvolution' at its best. Please enjoy – together with the team of LOGICDATA – the next technological milestone of our industry.

Yours Walter Koch, CEO

Be Logic – Be Free

In 2009 LOGICDATA introduced the first green control box based on electronic transformer technology instead of a toroidal transformer. With lower weight, reduced stand-by power and a minimum use of copper this control box has been an absolute revolution and game changer for the industry and has been unparalleled so far.

We are very proud to present the next step in our LogicEvolution, the brand new SMART control box which will yet be another milestone for you as customers. We have started from scratch and created a genuinely new control box that is by far the smallest and best integrated one on the market. With its highly optimized size it provides a maximum of freedom in design to our customers. Thanks to reduced packaging, freight cost and fewer raw materials used than in our COMPACT control box we were again able to reduce the ecological footprint of our product. And that's far from being all - please refer to page 2 to

get more exciting news and details about the new SMART.

Another LogicEvolution that we are introducing is our new TOUCH hand switch family. The TOUCH family provides a phenomenal design and elegant appearance. LOGICDATA now provides the new TOUCH & CLICK technology that allows recalling information by touching the surface and performing actions by pressing the function. With the all new TOUCH hand switch family you can easily apply your own designs to the switches' surface. We are sure that our new hand switch series adds the finishing TOUCH to your product and will excite your customers. Get more insight on LOGICDATA's new TOUCH hand switch family on page 3.

These terrific innovations are just the start of a new era – the LogicEvolution.

Get SMART Be Free.

The most compact control box on the market

All-rounder

The new SMART control box is compatible with the new TOUCH series, virtually all other LOGICDATA hand switches and the COMPACT control boxes

Fewer raw materials

used and a highly optimized packaging provide a best package for you and reduce the ecological footprint.

Fully functional

Even though it is the smallest control box on the market, no compromises on functionality have been made. Enjoy all the well-known features from SMART's predecessors.

Very low profile design

Provides a maximum freedom in design and makes integration in your table system easy

Ecologically optimized

The new SMART comes with a low stand-by consumption of 0,3 Watt in the standard version and has an option for 0,1 Watt

2 in 1

Add the new clip-on hand switch SMARTtouch to reduce your mounting efforts by 25 % and save costs for connection cable between control box and hand switch.

SMART *eco*

Next generation SMPS control box

Hardware options:

- 207VAC to 253VAC 50/60Hz version
- 90VAC to 127VAC 50/60Hz version
- 1 motor version
- 2 motors version

- 1 or 2 motors @ 220VA output power
- Reduced size and very low profile design
- Snap on hand switch SMARTtouch
- Compatible with all LOGICDATA hand switches
- High efficient switched mode power supply technology (SMPS)
- Freely programmable
- Adjustable software limits
- Speed control
- Plug detection
- Intelligent System Protection (ISP)
 - Software ISP
 - Actuator integrated sensor ISP
- Display
- Memory
- Container stop
- Shelf stop

SMART *touch*

Customizable SNAP on hand switch for SMART control box

- State of the art design
- Up / Down function
- Compact size
- Great button feel

TOUCH it Be Free.

Add the finishing
TOUCH to your
table system

Design your own

Complete freedom in the arrangement of functions, buttons and the design of the switch's surface.

Crowd pleaser

The new TOUCH family offers a premium surface design and an awesome new key press feeling

Easy installation of the TOUCHinlay

Graceful movement

Thanks to a push/push mechanism the new TOUCHdown slides out elegant and effortlessly from underneath the table-top

Key lock

Integrated lock function on TOUCHdown and TOUCHinlay

Touch & Click

Recall information by only touching the surface and perform functions by pressing the surface

TOUCH^{down}

- Customizable hand switch
- Individual button and function layout
- Mounting under table top
- Ultra-flat design
- Up to 4 memory positions
- Up to 2 motor groups
- 4-digit display for inch or cm
- TOUCH & CLICK function
- Key Lock
- PUSH & PUSH mechanism

TOUCH^{inlay}

- Customizable hand switch
- Individual button and function layout
- Mounting in table top
- Simple fixing with rubber mounting support (no screws necessary)
- Ultra-flat design
- Up to 4 memory positions
- Up to 2 motor groups
- 4-digit display for inch or cm
- TOUCH & CLICK function
- Key Lock

TOUCH^{basic DN}

- Customizable hand switch
- Mounting under table top
- State of the art design
- Up / Down function
- Compact size
- Great button feel

TOUCH^{basic IL}

- Customizable hand switch
- Mounting in table top
- Simple fixing with rubber mounting support (no screws necessary)
- State of the art design
- Up / Down function
- Compact size
- Great button feel
