Life=Style

When everything is connected, defining lifestyle is not a question of what you do, but where you do it. The cities in which we live – and the homes in which we reside within those cities – are increasingly transient: parts of a cosmopolitan way of living. Cosmopolitan means feeling at home, wherever you are in the world: the realization of an infinite palette of inspiration that empowers us to define our homes from the inside out.

This all starts, and ends, in bed. The COSMO Line by LOGICDATA is a collection of three outstanding bedroom products that are the perfect reflections of the cosmopolitan ideal: COSMO Sydney, COSMO Austin, and COSMO Vienna. With these high-quality adjustable bases, we provide the perfect frame, with the perfect features, at the perfect price: a wide-ranging portfolio that enables customers to experience the cosmopolitan lifestyle; from sunrise to sunset.

COSMO
Sydney

Pure and Simple.

The COSMO Sydney is inspired by the wide beaches, unique architecture, and endless sunshine of Australia's vibrant, up-and-coming jewel. Developed with compact, inner-city dwellings in mind, the frame was built to provide singles and young couples with a space to work, to play, and to live.

The COSMO Sydney is a sanctuary for young, urban households with an eye for stunning ergonomic design. A perfectly-optimized core feature set – with smooth up/down motion and programmable memory positions – makes this stylish adjustable an ideal addition to the homes of users who value maximum flexibility with minimum cost, space, and fuss.

The minimalistic COSMO Sydney not only provides the flexibility that users desire, it does so via a low-profile design that means moving the bed – from room to room or to whole new living spaces – incredibly simple. In fact, a single person can assemble the entire bed frame in just a few minutes.
