# Upgrade your LOGIClink with WORK & MOVE software

**WORK & MOVE ensures sufficient alternation between concentrated computer work, mental and physical movement. The software provides an optimised 'work-move-sit-stand-rest rhythm' based on your personal settings. The WORK & MOVE software works with LOGIClink over USB.**

## **WORK & MOVE gives you:**

- Personal advise when to stand and when to sit.
- Auto drive to raise/lower your desk.
- Tips to work smarter and healthier.
- Trophies, medals and compliments.
- A proven tool that triples alternation and doubles movement.

*Work Smart - Feel Good*
