

COSMO
Toronto

ADJUSTABLE
BED FRAME

COSMO
Toronto

Bright Lights of Toronto.

Toronto is renowned across Canada and beyond as one of the most livable cities in North America: a magnet for young couples looking to nest and create a bright future for their little ones. We have encapsulated the essence of the city's easy going optimism to create the family-friendly COSMO Toronto.

The COSMO Toronto is the perfect middle ground between the practicality of the entry-level COSMO Sydney and the full-featured COSMO Vienna. This makes the adjustable particularly well-suited to young couples looking to nest with their little ones, and a wonderful addition to any family home.

The frame is built on a similar design framework to the COSMO Sydney, with an expanded set of features that set it apart. Additional features and functionality – including under-bed light, USB ports and connection to our dedicated sleep control app – make this model the perfect way to experience more adjustability for less.

Dual USB Ports
to conveniently
charge all your
devices.

HEAD UP AND FOOT UP

Smooth up and down movement of the head and foot sections.

WIRELESS REMOTE CONTROL

Move effortlessly to new bed positions at the touch of a button.

CHILD LOCK

Effective protection against unintended or unauthorized use.

PRE-SET FLAT POSITION BUTTON

Move gently to a sleeping position with just one touch.

2 PRE-DEFINED MEMORY POSITIONS

Enjoy anti-snore or zero-gravity mode, or set your own.

EMERGENCY LOWERING

Failsafe to operate the bed in case of power outages.

FREE-FALL DESIGN

Reduced risk of pinching during downward motion.

ZERO-CLEARANCE

Platform-friendly design that allows for maximum customization and use without legs.

LED UNDER-BED LIGHT

Never lose your way at night.

APP CONTROL

Ditch the Remote, keep the Control.

700 LB WEIGHT CAPACITY

Strong enough for the deepest of sleepers.

10-YEAR LIMITED WARRANTY

Peace of mind, to help you sleep even better.

USB PORTS

Stay in touch with your smart device, even when it's charging.
