

MIDDLErail

Versatile Adjustment Module for Bed Frames

Compact design with integrated electronics
and optimum functionality.

More about
the MIDDLErail

- Clean design with integrated electronics
- Head and foot adjustment
- Wired, wireless remote or app control
- Compatible with a high range of bed sizes
- Quick and easy installation

MIDDLErail Benefits at a Glance

Premium Performance

Stability, long product life and durability due to the long-lasting metal frame.

Safe Electronics

Low-voltage control technology and extremely low standby voltage – effective against electrosmog.

High Product Quality

Designed and developed in Austria with continuous control processes for all materials.

Sophisticated Design

The power supply directly integrated in the rail simplifies cleaning under the bed.

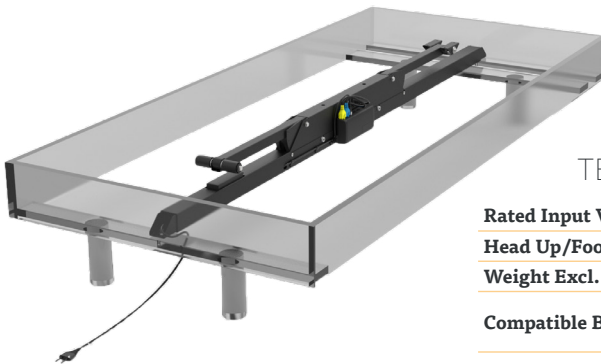

Quiet Technology

Quiet and peaceful sleep through whisper-quiet motor technology.

Simple Extension

Control via cable, wireless or app. Extension to two MIDDLErail with synchronization via cable.

TECHNICAL DATA

Rated Input Voltage	100-240V 1.6A
Head Up/Foot Up Angle	60° 40°
Weight Excl. Packaging	11 kg
Compatible Bed Frames	Width: 60-140 cm Length: 190-220 cm
Max. Load, Evenly Distributed (Excl. Mattress)	Static 250 kg Dynamic 150 kg
